# My Creative Process

01

## Discover

Understanding the brief is paramount for me. It sets the stage, outlining client goals, user needs, constraints, and brand guidelines.

02

## Define

Gathering more information is essential components of my design process. It helps me understand the target audience, market trends, and potential competitors.

03

## Iterate

I create initial concepts, iterate based on feedback, and refine the product. This process ensures a user-friendly and successful design.

04

## Testing & Hand-off

I provide detailed design specifications to developers, ensuring accurate implementation. Thorough testing guarantees a seamless user experience.

# Creative Agency Website

Web Design

Product Design

[Live Project →](#)

This project overhauled the agency's digital presence, adopting a creative marketing-led design to clearly communicate the mission of "Enabling Innovation" to B2B clients.

As the web designer, I was responsible for developing the site using Framer. I translated the new strategic direction into a responsive, high-performance website, ensuring a seamless and premium user experience across all devices.

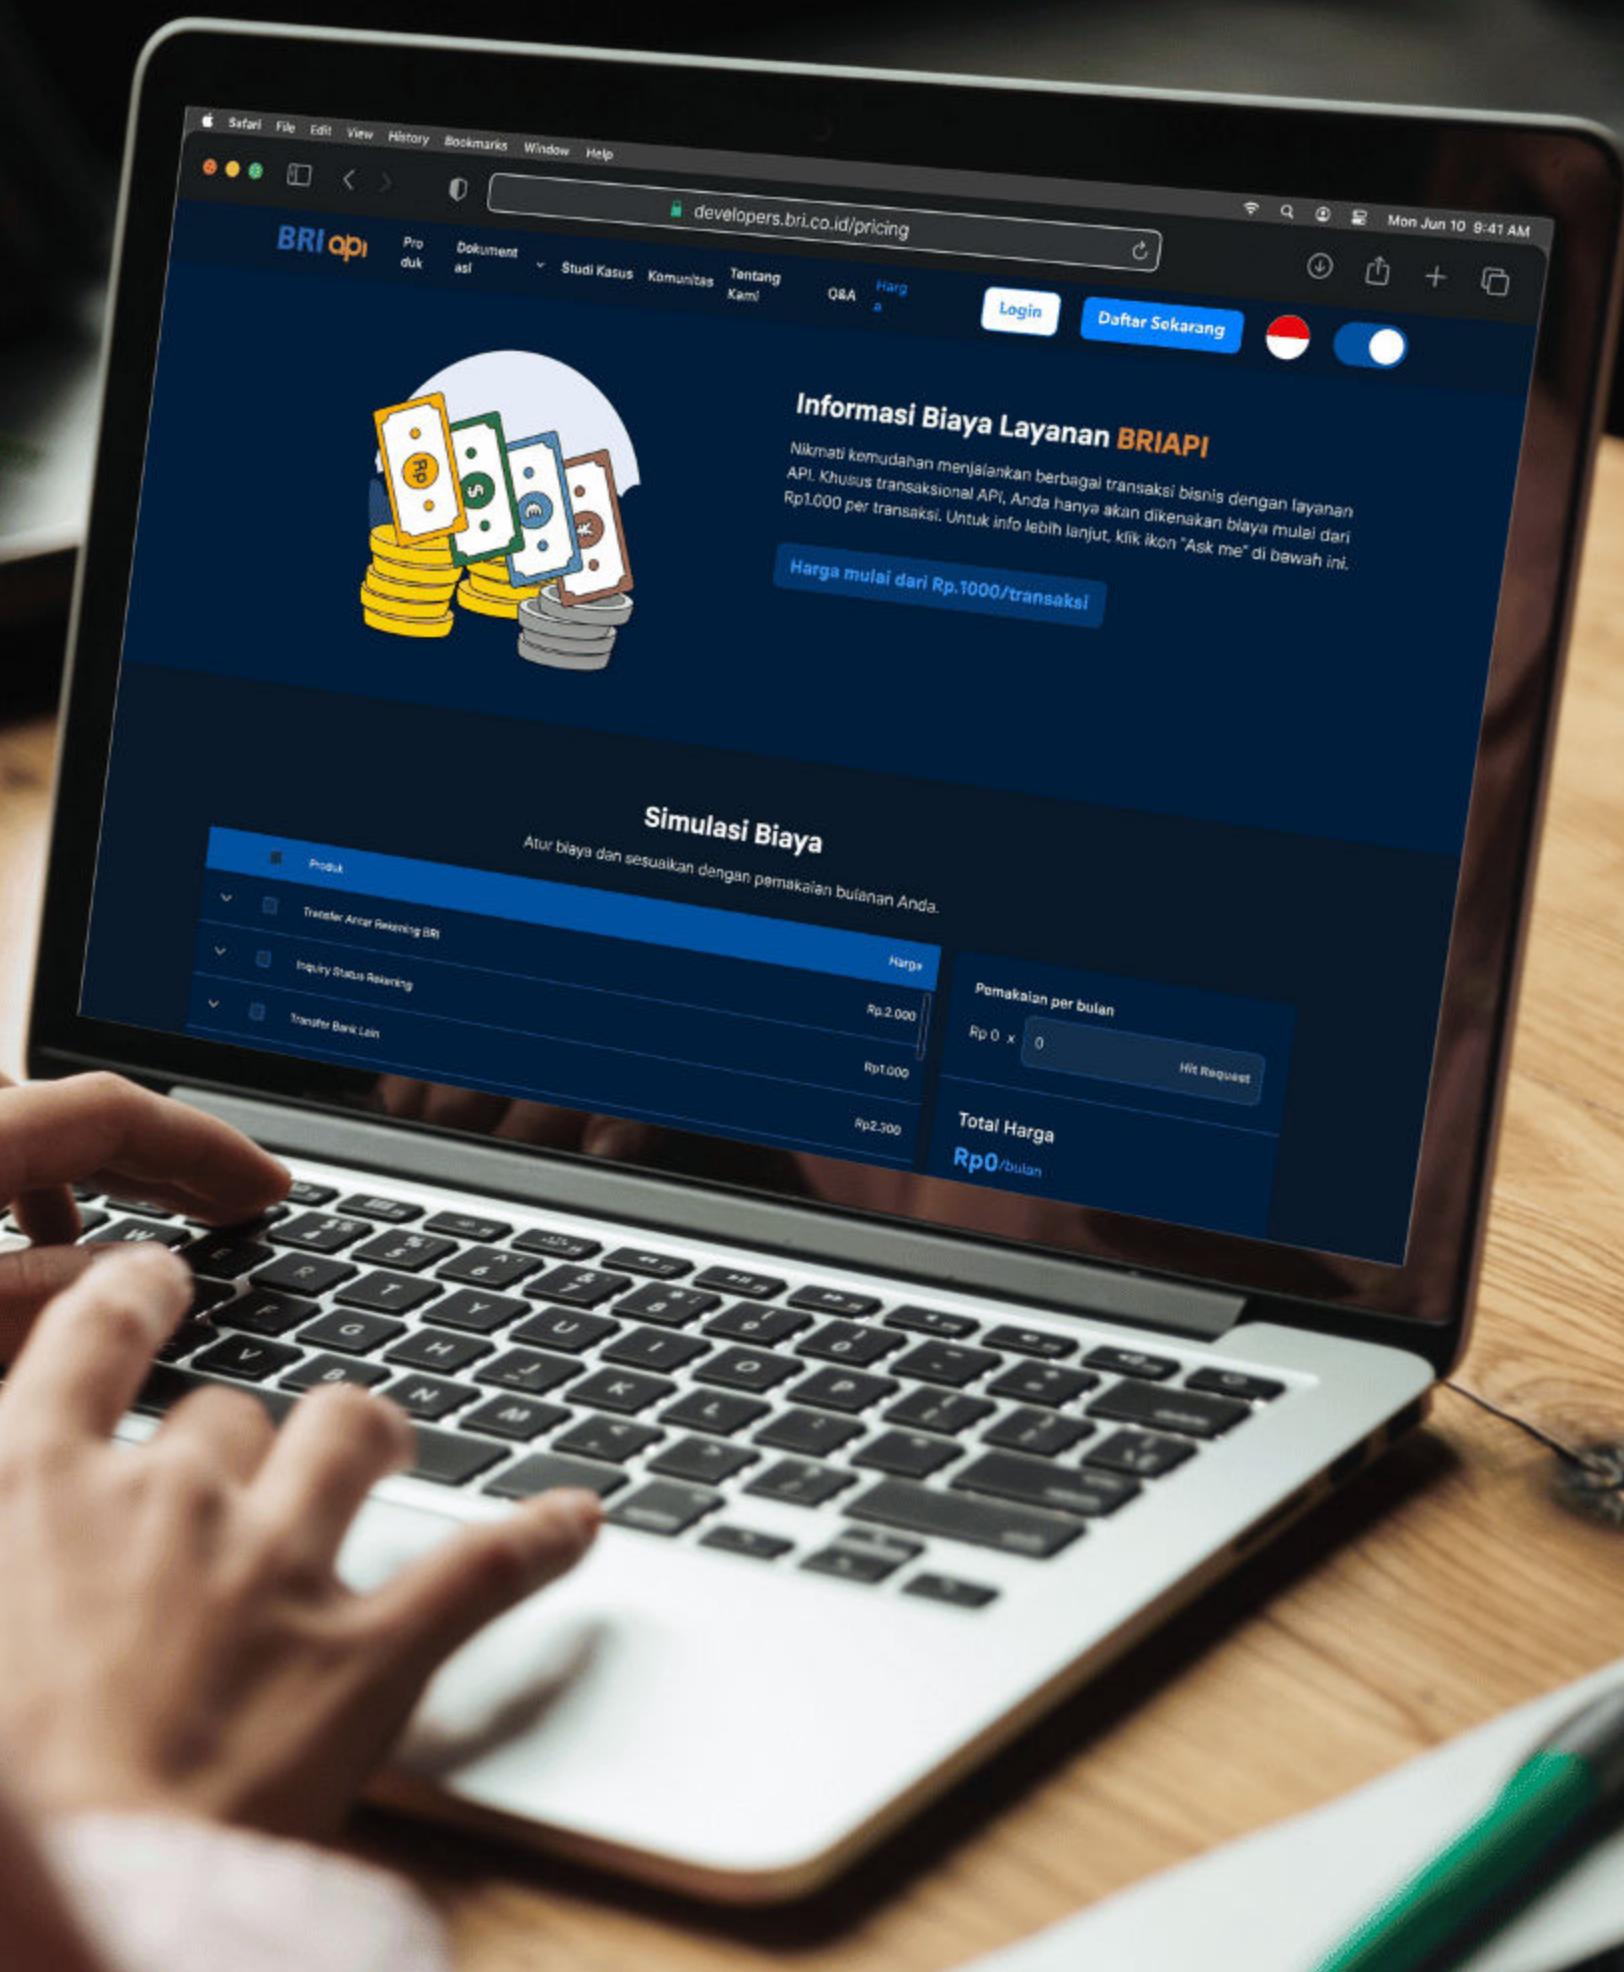

# BRIAPI Dev Studio

[Website](#)[Product Design](#)

BRIAPI is an Application Programming Interfaces (APIs) developed by BRI that enables customer's application to be able to integrate with BRI banking services easily and quickly.

My responsibility was to make an experience where user can estimate and simulate the pricing of the services they want to implement.

[See this improvement I made on the pricing page →](#)

2025

The image displays a collection of screenshots and documentation pages related to the BRI API (BRI Application Programming Interface). The content includes:

- Autentikasi (Authentication):** A table showing parameters for a GET request, including **Value** (Bearer [TOKEN]), **Key** (Authorization), and **Timestamp**.
- Transfer Antar Rekening BRI:** A screenshot of a developer console showing a list of transactions.
- Transfer Bank Lain:** A screenshot of a developer console showing a list of transactions.
- Tarik Tunai Tanpa Kartu:** A screenshot of a developer console showing a list of transactions.
- Informasional:** A screenshot of a developer console showing a list of transactions.
- Valuta Asing:** A screenshot of a developer console showing a list of transactions.
- Tarik Tunai Tanpa Kartu:** A screenshot of a developer console showing a list of transactions.
- Service BRI MT940:** A screenshot of a developer console showing a list of transactions.
- Prosedur Rekonsiliasi:** A screenshot of a developer console showing a list of transactions.
- Common Errors:** A screenshot of a developer console showing a list of transactions.
- Portfolio Project:** A screenshot of a developer console showing a list of transactions.
- Onboarding:** A screenshot of a developer console showing a list of transactions.
- Apakah Saya Tahu?** A screenshot of a developer console showing a list of transactions.
- budarina.com**:
  - A screenshot of a form titled "Yuk, Isi Formulir Permintaan API yang Anda Butuhkan!" (Fill out the API request form you need!). It includes fields for "Nama Perusahaan" (Company Name), "Nomor HP" (Phone Number), "API yang Ingin Digunakan" (APIs you want to use), and "Alasan Penggunaan" (Reason for use).
  - A screenshot of a page titled "Informasi Biaya Layanan BRI API". It states that BRI Kemaslahatan provides various services with fees starting from Rp.1000/transaksi. It includes a "Simulasi Biaya" section where users can calculate costs based on usage per month.
  - A screenshot of a page titled "Dokumentasi" (Documentation) featuring a large illustration of a person working at a desk with a laptop and papers.
- stud.kasus:** A screenshot of a developer console showing a list of transactions.
- Produk:** A screenshot of a developer console showing a list of transactions.
- Dokumentasi:** A screenshot of a developer console showing a list of transactions.
- Autentikasi:** A screenshot of a developer console showing a list of transactions.
- Transfer Antar Rekening BRI:** A screenshot of a developer console showing a list of transactions.
- Transfer Bank Lain:** A screenshot of a developer console showing a list of transactions.
- Tarik Tunai Tanpa Kartu:** A screenshot of a developer console showing a list of transactions.
- Informasional:** A screenshot of a developer console showing a list of transactions.
- Valuta Asing:** A screenshot of a developer console showing a list of transactions.
- Tarik Tunai Tanpa Kartu:** A screenshot of a developer console showing a list of transactions.
- Service BRI MT940:** A screenshot of a developer console showing a list of transactions.
- Prosedur Rekonsiliasi:** A screenshot of a developer console showing a list of transactions.
- Common Errors:** A screenshot of a developer console showing a list of transactions.
- Produk:** A screenshot of a developer console showing a list of transactions.
- Dokumentasi:** A screenshot of a developer console showing a list of transactions.
- Jelajahi Berbagai Layanan BRI API:** A screenshot of a developer console showing a list of transactions.

# BRIlink Mobile

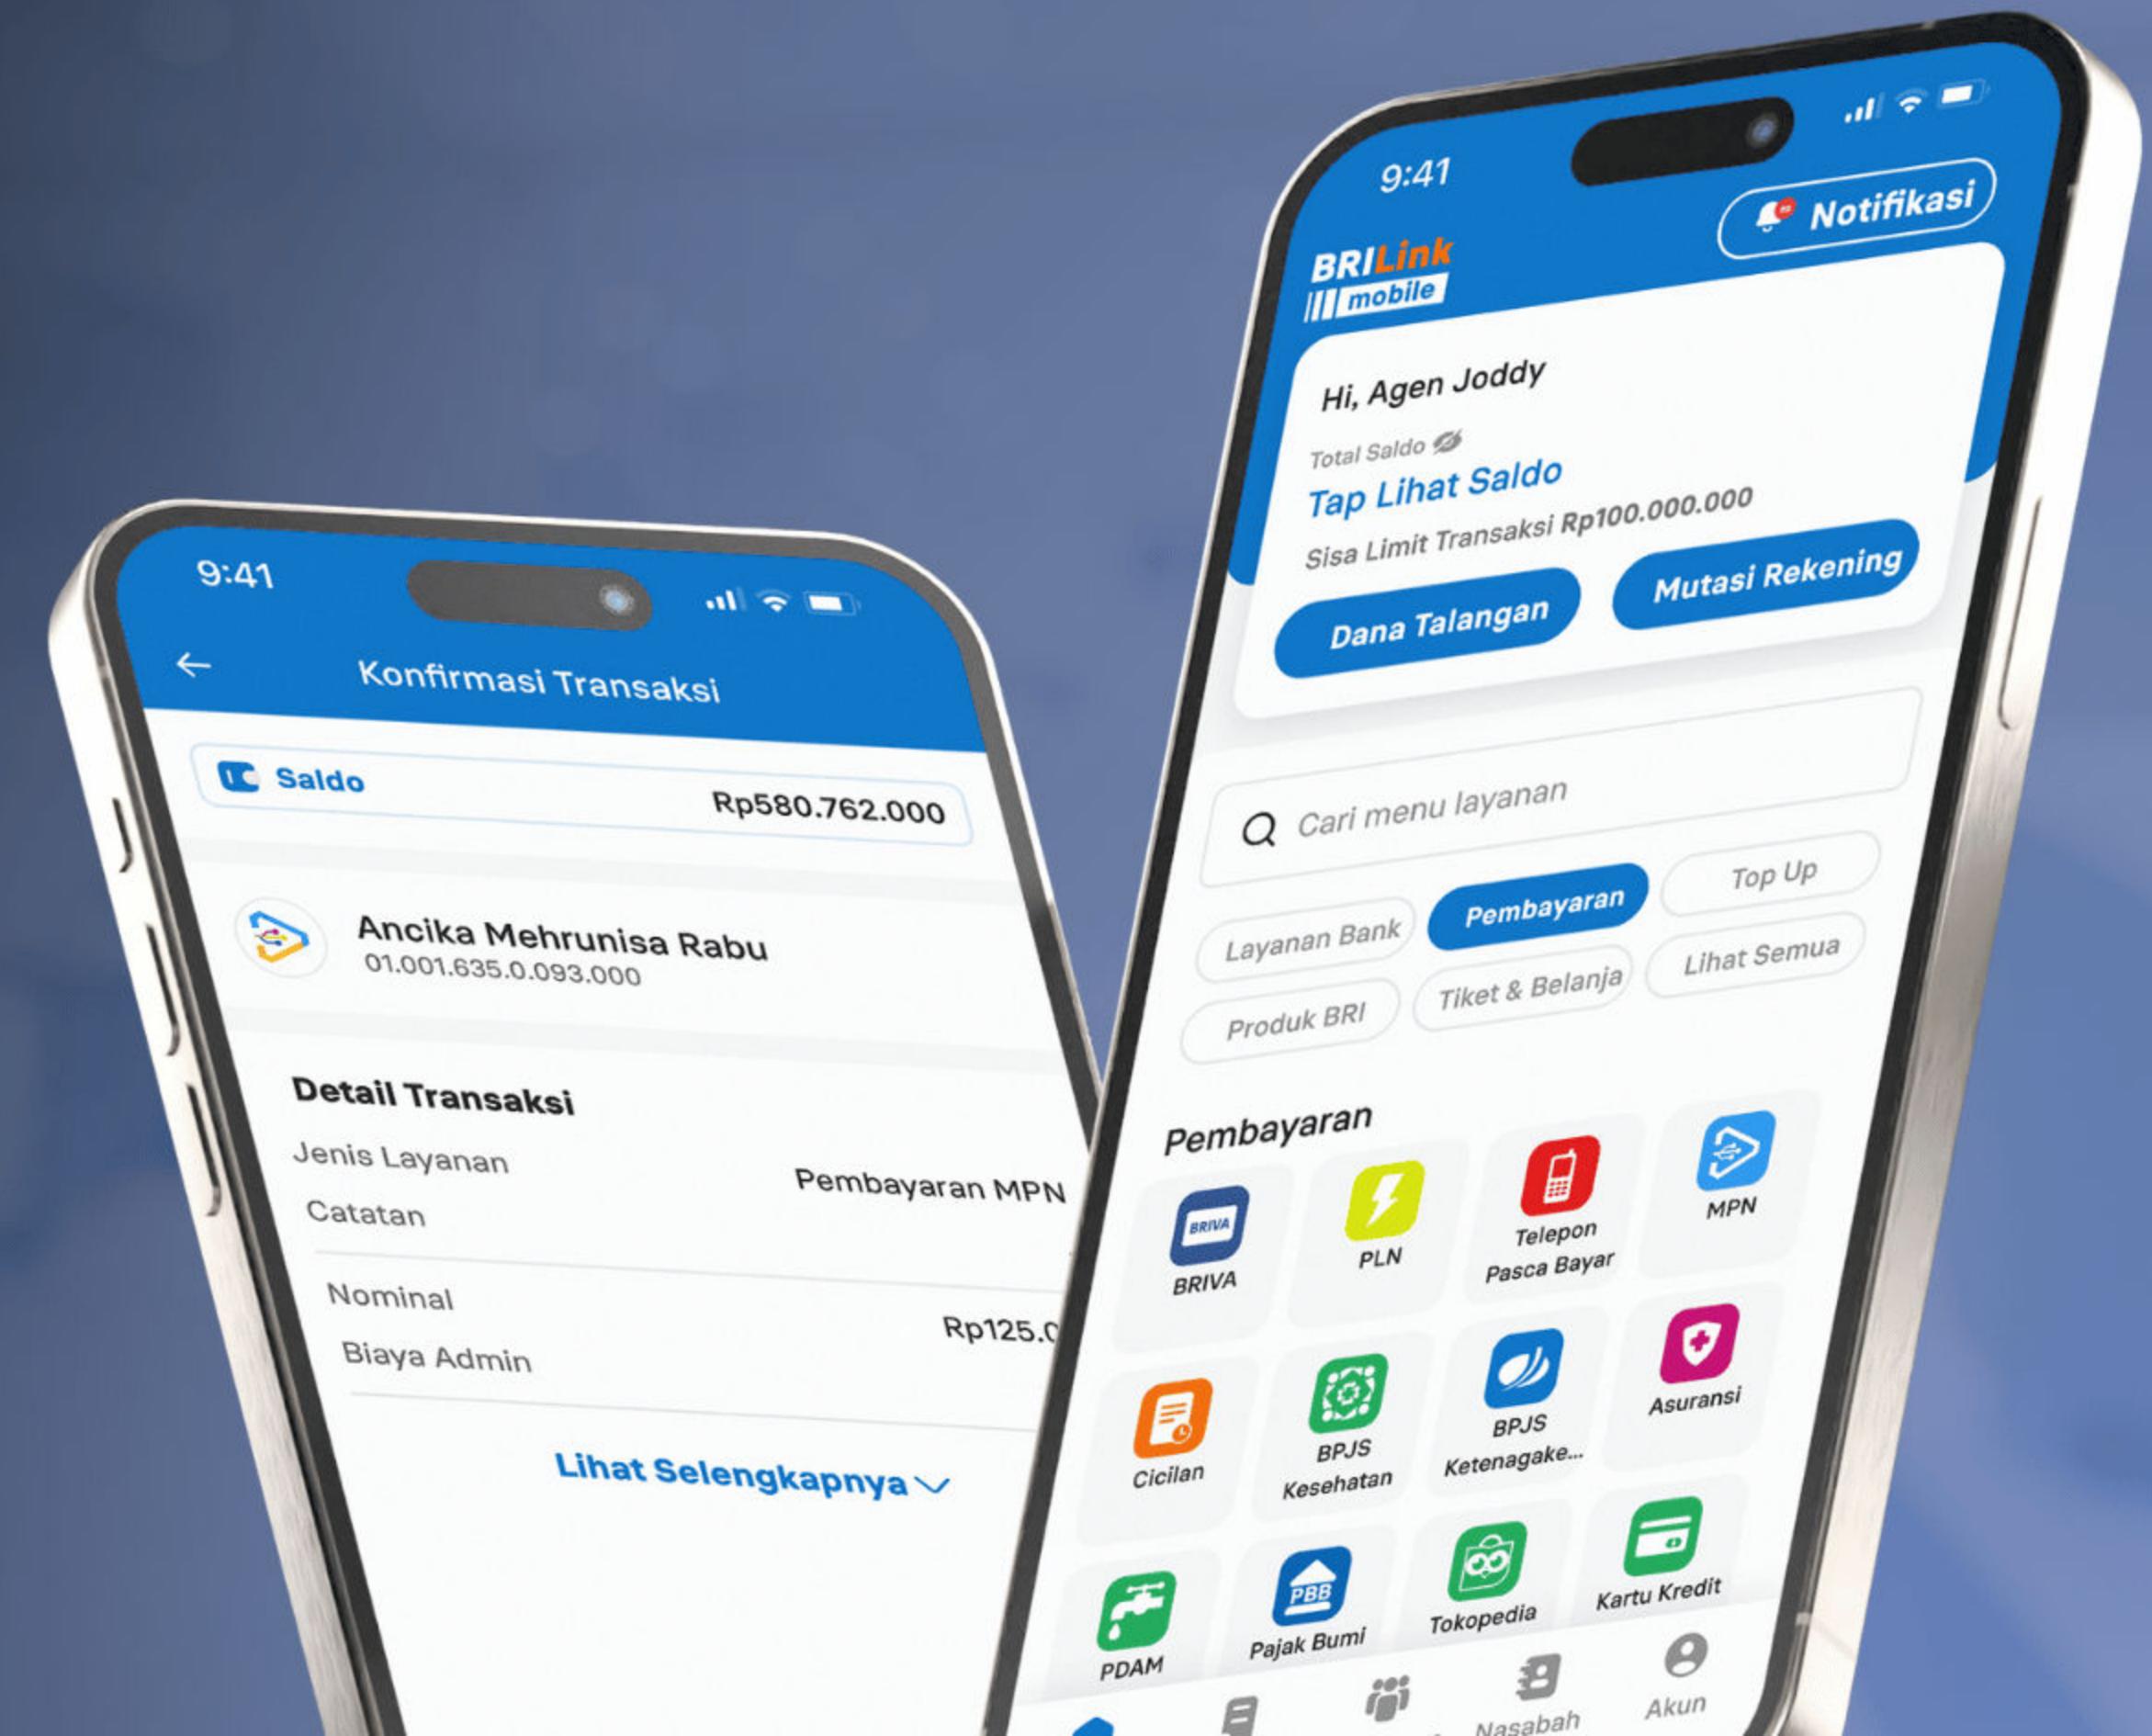

App

Product Design

BRIlink is an extension of BRI's services, where BRI collaborates with its customers as Agents who can facilitate real-time online banking transactions for the community through a fee-sharing concept.

BRIlink Mobile simplifies access to these services by allowing users to utilize them via smartphones.

I contributed to update the design of various transaction menus, such as payments for PBB and MPN, to achieve greater cohesion within BRI's design system, known as BRIDEX.

# Gamatek Website

Web Design

Wordpress Development

Gamatek is a tech partner for businesses, offering expertise in creating effective landing pages and developing SaaS products, backed by experience and a track record of successful projects.

I was in charge of designing the experience and developing the landing page using wordpress and page builder.

# Komunihub Website

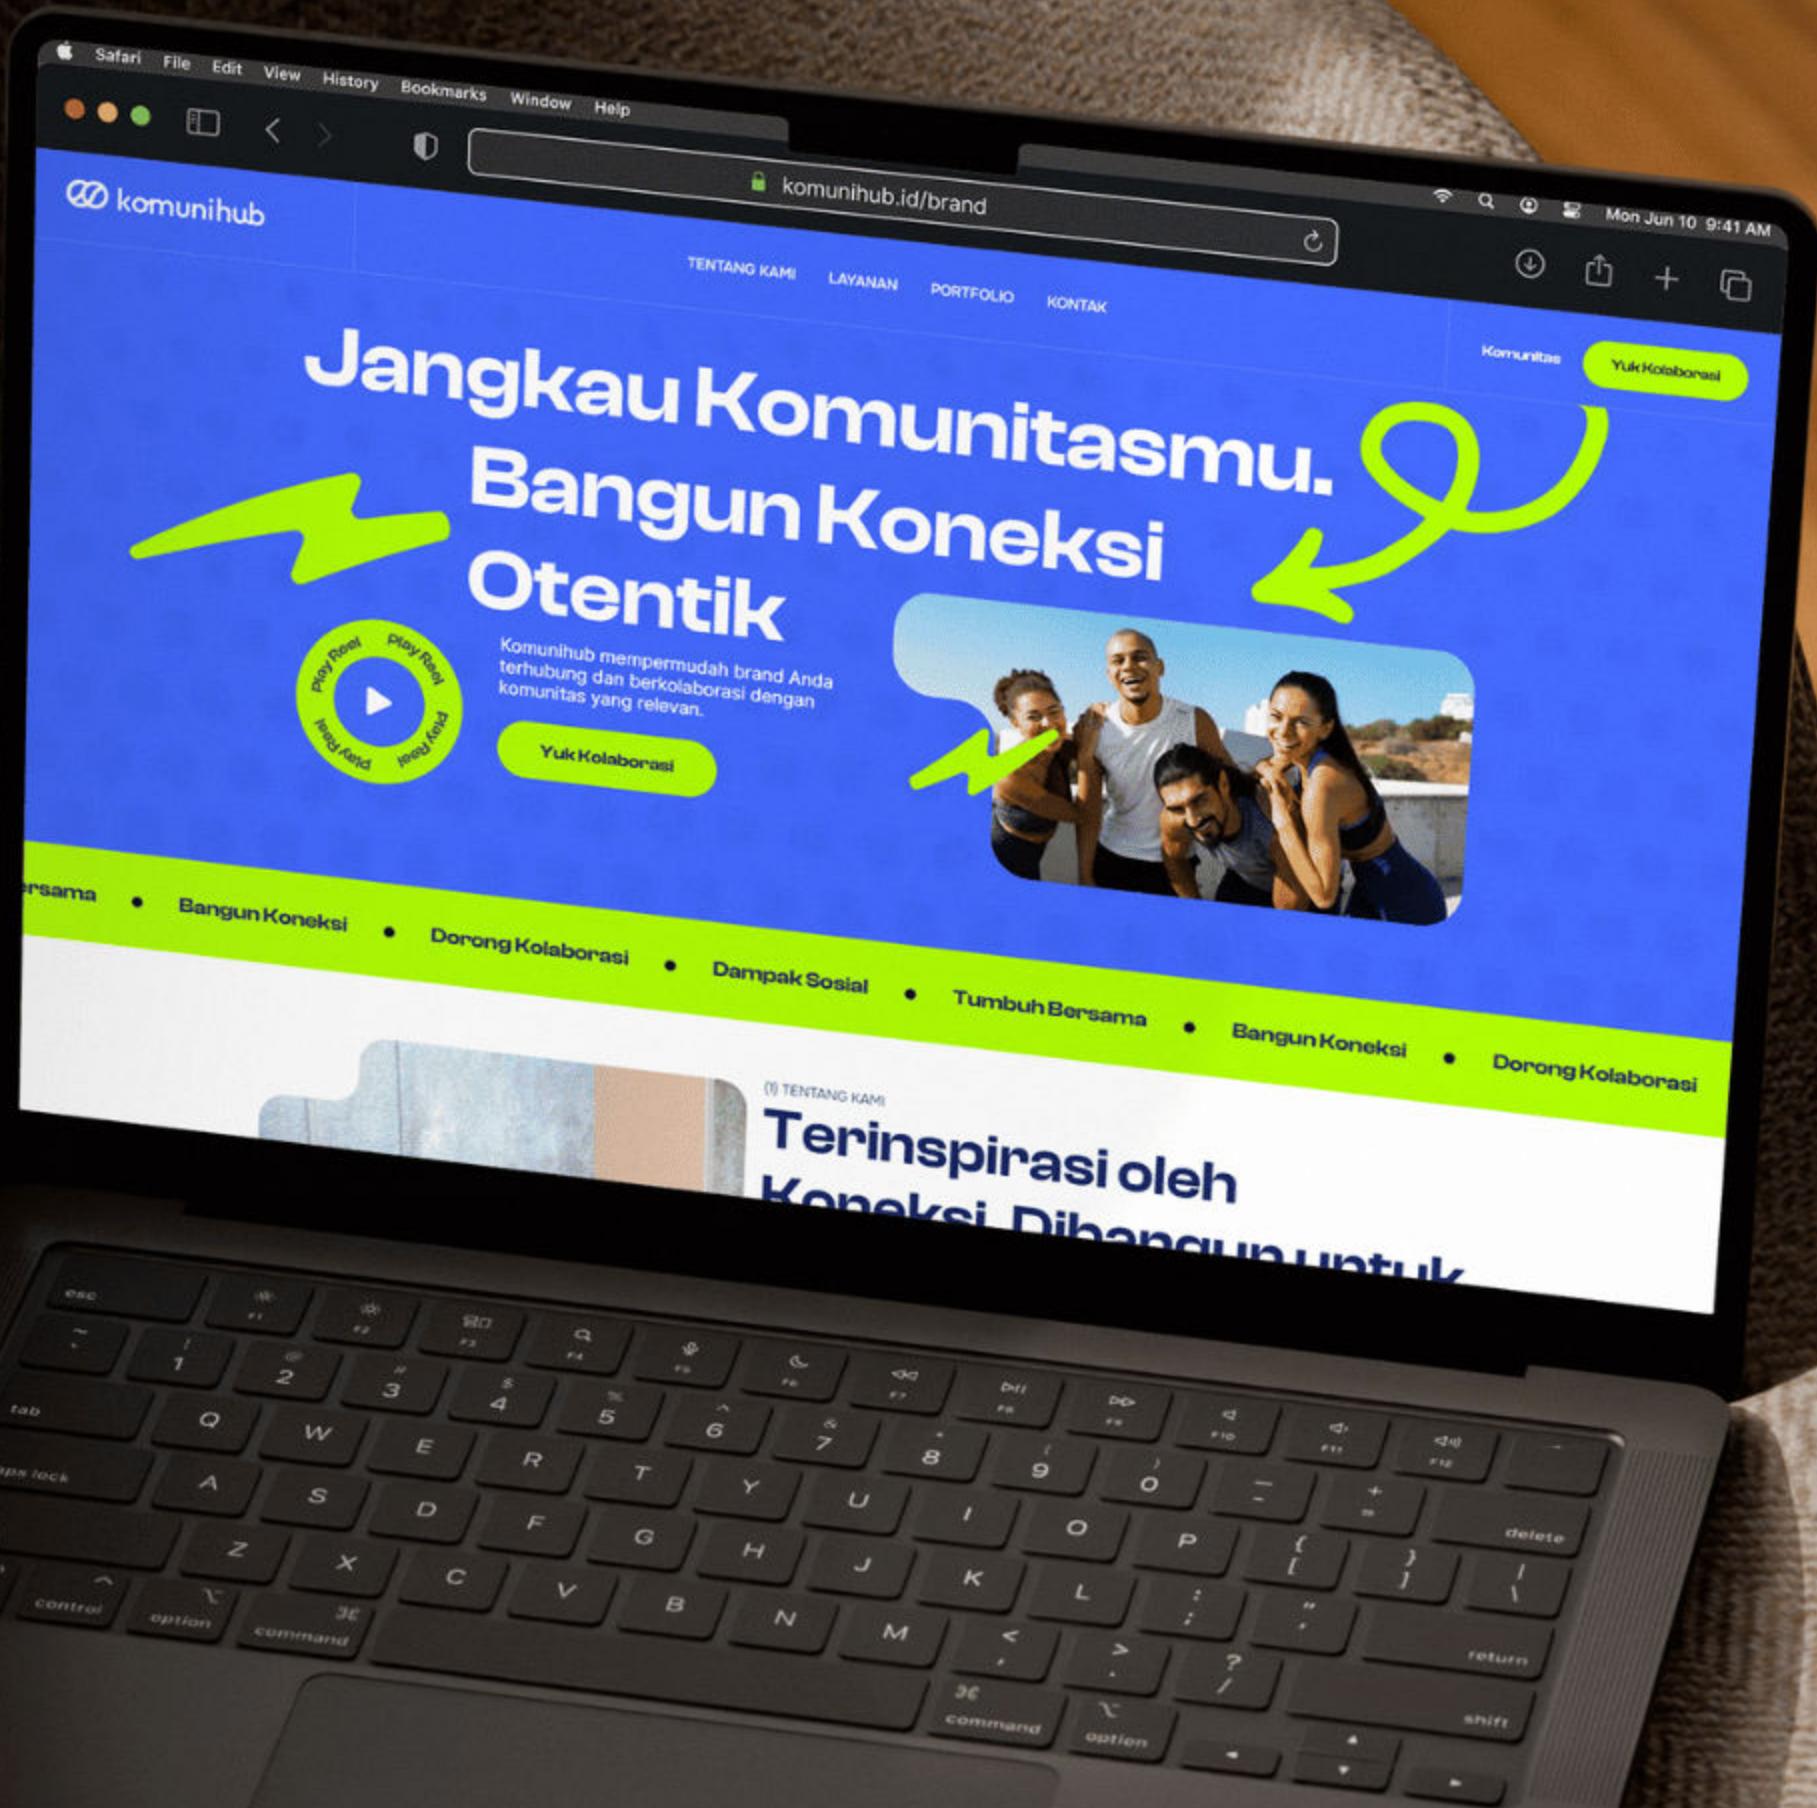

Web Design

Wordpress Development

Komunihub is a media platform that empowers communities to grow and amplify their voices while serving as a bridge for brands to connect with the right audiences.

By linking communities with brands, Komunihub helps foster authentic engagement, ensuring that brand messages resonate meaningfully and create lasting impact.

My responsibility was to develop the design provided using Wordpress.
